

# AGILE VALUES and PRINCIPLES

...

Agile is the ability to create and respond to change.

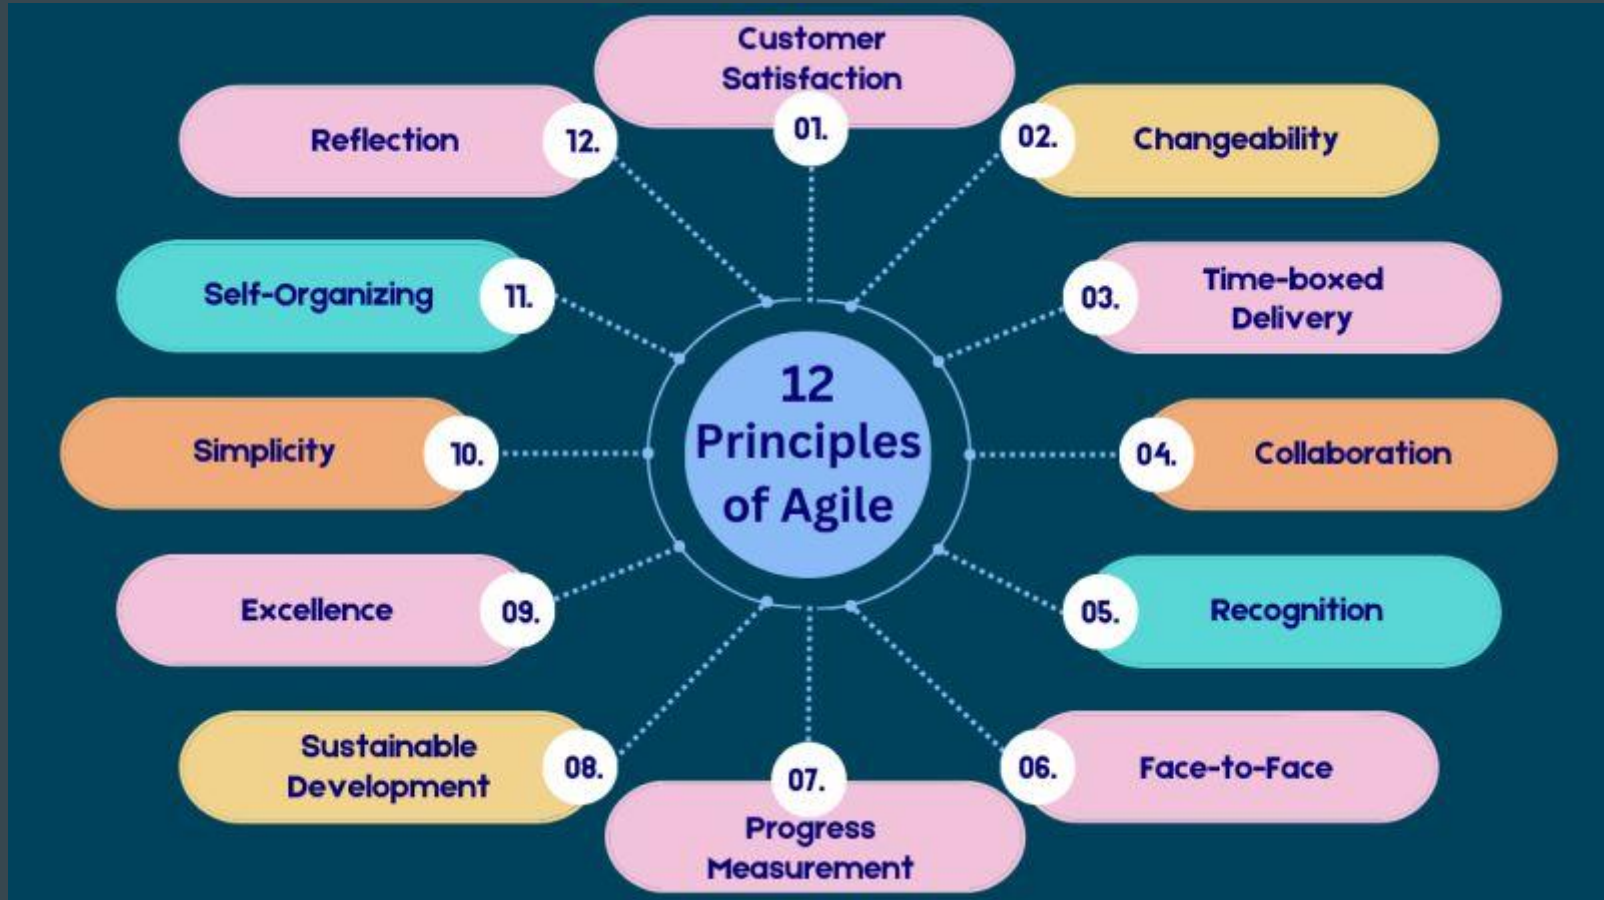

[AGILE Website](#)

# Agile Values

1. Individuals & Interactions
2. Working Software
3. Customer Collaboration
4. Responding to Change

Traditional Framework	Agile Framework
More Rigid and Directions coming Top to Down	Team may conduct dozens of experiments to see which works best
More Commanding and Controlling style of Leadership	Communication flowing freely between all the team members
Spoon Feeding; Management tell everyone "What to Do"	Self-Organizing; work is distributed with consensus by the Team itself
Planning Centric and Plan Driven	Plan could be very fluid in Agile world as Agile projects are more fluid then waterfall projects
Document Oriented and Document Driven	Cross functional, Self-Contained and Agile is ultimately pragmatic
Resistant to Change	Agile Projects are welcoming to change; true even changes are introduced late in the project

# 12 Agile Principles
